
MEMBERSHIP SETUP FORM

PLEASE TYPE IN THE ANSWERS TO THIS FORM and E-mail to:
customerservice@merchantpartners.com or
Print, Fill Out and Fax to: 310-826-0404

- The membership system requires installation of a PERL script for UNIX servers, or AuthentiX software for NT systems running IIS. Merchant Partners will install the script (UNIX) free of charge, but requires login access to the web server. The AuthentiX software package requires an additional fee from Flicks Software. You can purchase AuthentiX at <http://www.flicks.com>. **Merchant Partners does not provide technical support for AuthentiX.** Any support provided for 3rd party products will be billed at \$105.00 per hour.
- Merchant Partners does not need root access, only FTP access to the website. If the merchant desires to have their own staff install the script, we will be happy to provide the script to facilitate installation. Merchant Partners cannot guarantee the operation of any membership setup installed by the merchant.
- For NT systems, we will provide a script that the NT administrator must install. The script must be used in conjunction with AuthentiX. Our technical department will e-mail the script and directions to you when your setup is in progress.
